EDUCATION

Ontario Tech University

Sep 2023 – Apr 2028

Bachelor of Engineering (BEng) - Software Engineering Co-op (Honours)

Oshawa, ON

- **Coursework:** Data Structures & Algorithms, Databases, Systems Programming, Artificial Intelligence, User Experience

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, C++, C#

Frameworks: React, Next.js, Node.js, Express, React Native, FastAPI, Flask

Databases/Cloud: PostgreSQL, MySQL, Supabase, AWS, Docker

Tools/AI: Git, Jira, Postman, OpenAI API, LLMs, Power BI

Concepts: REST APIs, Authentication, RBAC, Testing, Debugging, SDLC, Incident Triage

EXPERIENCE

Software Developer

May 2026 – Aug. 2026

Canadian Golf Brands Alliance

Toronto, ON

- Refactored legacy PHP/Symfony registration and membership workflows, optimizing application logic and database queries to reduce redundant processing by approximately **30%** across multitenant environments
- Implemented tenant scoped registration workflows and data access controls across routing, backend logic, and database layers, resolving schema issues to maintain reliable **data isolation** between client environments
- Evaluated scheduling, membership, and engagement workflows and presented an AI modernization roadmap covering automated scheduling, personalized recommendations, and predictive engagement analytics

Full Stack Developer

Jan. 2026 – Apr. 2026

SGMC Canada

Toronto, ON

- Built user onboarding, role based access control, and administrative dashboards using Next.js, React, Node.js, and PostgreSQL, reducing manual account management steps by approximately **40%**
- Designed and optimized **REST APIs**, PostgreSQL queries, and authorization checks, reducing unnecessary data retrieval by approximately **35%** across user and administrative workflows
- Diagnosed and resolved authentication, API, database, and UI defects across the UI to API to PostgreSQL flow, validating fixes end to end and documenting root causes

Frontend Developer

Sep. 2025 – Dec. 2025

Solora Tech

Toronto, ON

- Engineered and launched a **10+ page** production React website from Figma designs, developing reusable UI components that reduced duplicate frontend implementation by approximately **30%**
- Owned frontend delivery through production deployment, implemented on page SEO, and resolved responsive layout and rendering defects across desktop, tablet, and mobile devices

PROJECTS

RotateOps | *React, Node.js, Supabase, Slack API*

- Built an operations workflow platform using React, Node.js, and Supabase, automating recurring task assignments and reducing manual assignment steps by approximately **60%** through automated ownership tracking, recurring scheduling, and centralized status coordination across team workflows
- Designed REST APIs and Supabase backed workflows connecting task creation, assignment, status changes, real time application updates, and automated **Slack API** notifications to streamline team coordination and task visibility

NovaPrep | *React, Node.js, Express, AWS*

- Built an AI assisted exam preparation platform with personalized study planning, session tracking, and AI generated learning content, reducing manual study planning effort by approximately **50%** through automated study workflows
- Designed REST APIs and backend application logic connecting user profiles, study sessions, and AI generated content with persistent server side workflows and stored user data across study sessions

ForgeFit | *React Native, TypeScript, Supabase, OpenAI API*

- Built a cross platform fitness application with authentication, workout tracking, and persistent fitness data, reducing manual workout planning steps by approximately **55%** through personalized recommendation workflows
- Developed Supabase backed authentication, database, and storage workflows and integrated the **OpenAI API** to generate personalized workout recommendations from user goals, training preferences, and stored fitness data
